# Healthy Eating

## FOR COLLEGE and UNIVERSITY STUDENTS

Diabetes Hope Foundation holds a very unique position within the diabetes community; we have adopted virtual platforms of all our programs to be able to continue to help support more people during these trying times.

Through our Wellness Wednesday Webinars we discover how resilient our community has been throughout the Covid pandemic by adapting various activities and discovering new hobbies and many of today's youth have taken up cooking as a new hobby, making it the #1 activity during Covid.

This year, Diabetes Hope Foundation, along with their alumni spearheaded a supplementary guide to accompany our "Guide for Successful Transition to College and Universities" to provide youth in transition with easy, healthy recipes and tips for managing their diet and diabetes while living away from home and on campus.

Restrictive dietary needs associated with diabetes, such as celiac disease, lactose intolerances, gluten free and vegan requirements, are featured as well as favourite healthy recipes for study snacks, breakfast, lunch, dinner and dessert.

The final alumni cook book has been reviewed and tested by a diabetes educator and registered dietitian to ensure that the recipes will help students achieve balanced diets to thrive while they are at school.

*Thank You!*

## What about calorie information, recipe and nutrient analysis?

Appropriate serving sizes are so individualized (ex. size, age, activity level, appetite, health) and nutrient data will depend on so many variables. This includes preparation methods, accuracy of ingredient measurements, recipe modifications and substitutions, all which can dramatically change the calorie and macro nutrient content of a recipe.

If you would like to learn more about reading food labels, or require more detailed nutrition information about any of your favourite recipes, or the recipes in this guide, check out these links and tips.

When it comes to eating healthy, **keep it simple**. Stocking your fridge with staples to build a healthy plate along with some basic prep to ensure your staples are easy to grab, will ensure your food doesn't go to waste, AND helps makes the healthy choice the easy choice. From there, pick a variety of colourful, whole, foods that you love and don't be afraid to experiment with new grocery items to keep it interesting.

### Here are some quick **TIPS FOR SUCCESS:**

**Tip 1:** Avoid grocery shopping when hungry.

**Tip 2:** Make a grocery list. Assess your week first; have a loose plan for meals, snacks and recipes that coincide with your schedule and activities.

**Tip 3:** Stick to the outer aisles for 90% of your groceries. Ever notice outer aisles are denser in whole foods versus processed, packaged foods?

**Tip 4:** Use labels to compare options. Generally, opt for ones with **more** fiber, protein, and key nutrients, and **less** added sugars, preservatives and sodium.

**Tip 5:** After your weekly shop, organize your fridge. Examples include washing and chopping your favourite fruits and veggies. When it's cooking time, consider batch cooking to save time and mess. Whole grains like rice, oatmeal, barley and quinoa reheat well. Basic proteins and roasted veggies can be repurposed to make things easy for the week. *If you don't have good air tight containers and large ziplock bags, add those to your list!*

**Tip 6:** Don't forget to scour the grocery store for convenient pre packs, like veggie trays, bagged salads, stemmed beans, pre washed snap peas, baby or grated carrots, cherry tomatoes, rotisserie chicken, tofu blocks, edamame, frozen fruits and veg. Many of these items are great options for quick meal additions.

**Designing a balanced meal?** Recipes are great but you don't need a recipe to create a nutrient dense plate that meets your needs and tastes great!

Consider building your plate with the "**basic components checklist**" of a balanced plate and incorporate recipes as you get more comfy in the kitchen.

## Designing a balanced meal?

Recipes are great but you don't need a recipe to create a nutrient dense plate that meets your needs and tastes great!

Consider building your plate with the “**basic components checklist**” of a balanced plate and incorporate recipes as you get more comfy in the kitchen.

### Here's your checklist:

✓ Protein Source: Meat, chicken, turkey, fish and canned fish, seafood, eggs, egg whites, cottage cheese, greek yogurt/skyr, legumes, tofu, tempeh, seitan, canned fish, edamame, protein powder, skim milk powder

✓ Carbohydrate Source: Whole grain or lentil pasta, quinoa, brown rice, barley, farro, sprouted whole grain or gluten free high fiber breads and wraps, corn, oats and oatmeal, legumes, all fruits, plantains, potatoes, sweet potatoes, butternut squash/pumpkin

✓ Colourful Veggies/Fruits: Bok choy, broccoli, asparagus, bean sprouts, tomatoes, eggplant, zucchini, leafy greens, cabbages, green beans, frozen mixed veggies, peppers, carrots, beets, celery, cucumber, onions, mushrooms, all fruits

Healthy fat source: Plant based oils, coconut, avocado, nuts/seeds, cheeses, fatty fish like salmon or sardines

# Have you heard of the plate method?

The plate method is a fool proof way for most people to meet their needs, including those with type 1 diabetes.

It's a perfect place to start. The new Canada's Food Guide plate is a good example of the basics.

# How to use the Plate Method

The **PLATE METHOD** encourages you to fill:

- $\frac{1}{2}$  your plate with colourful fruits and veggies
- $\frac{1}{4}$  of your plate with protein rich foods including meat, poultry, fish/seafood, tofu, eggs, dairy, and legumes
- $\frac{1}{4}$  of your plate from fiber-full carbohydrate foods, such as whole grains or starchy fruits and vegetables
- Add a thumb size portion of fats; focus on heart healthy fats, including nuts, seeds, avocado, olive oil
- Make your beverage of choice water or milk (plant-based or other alternatives)

**The diabetes plate? Is the plate method different for diabetes?** The diabetes plate looks the same as the regular plate! Keep in mind that fruits, some veggies like potatoes, sweet potatoes, squash, corn and legumes contain higher carbohydrate content and will impact blood sugars, compared to leafy greens and other non starchy vegetables which have minimal impact on blood sugar. For this reason starchy vegetables should be portioned according to the yellow  $\frac{1}{4}$  portion of the plate shown above.

If you're an athlete, have dietary restrictions, or need to lower your carbohydrate intake for better blood sugar control, there may be some modifications. Having a registered dietitian check in with you is a great idea!

**What about variety?** Sticking with your favourite staples is a perfect for your key meals and snacks. But a bit of variety is good. Changing it up allows you to better meet your nutrient needs. This means micro nutrients that support your health and metabolism including vitamins and minerals. Iron, potassium, magnesium, zinc, vitamin C, B vitamins are just a few examples. Did you know colourful foods provide more nutrients? Think yellows, greens, purples, reds and oranges. In addition, the less processed your foods are, the more nutrients they retain and the more filling they are. All good reasons to get cooking and stick to the outer aisles!

## QUICK VEGGIE FRITTATA WITH PESTO

### Ingredients:

- 4 whole eggs
- ½ cup egg whites (optional)
- ½ cup vegetable choice chopped small
- 2 oz. cheese grated or sliced (optional for DF)
- 1 tbsp. pesto (vegan if desired)
- ½ tbsp. olive oil or butter for the pan

Recipe  
Variation  
Options

DF

GF

HP

MF

### Instructions:

- Mix your eggs or a combo of eggs and carton egg whites into a bowl.
- Add your frittata fixings to the bowl (ie. cheese, ham, veggies, salt, pepper, herbs, pesto) and whisk with a fork. If your vegetables are raw and you prefer your fixings soft/cooked, sauté in the pan first then add to your egg mixture.
- Use an OVEN-SAFE pan and heat to medium heat on the stove top. Once hot, add a bit of olive oil or butter to your pan (should be sizzling).
- Pour in egg mixture and let the thin layer of egg set, swirl the pan and pull-in the edges in to allow some of the raw egg mixture to make contact with the bottom pan.
- Then, pop it in the oven with your oven set to BROIL. If you like it cheesy, add a few extra cheese slices to the top, let it broil for 2 min. until all the egg is set and cheese is oozy.

## Tips

**Tip 1:** Any veg raw, or pre-cooked works. Leftover veg works great! Make extra broccoli, cauliflower or steamed spinach for dinner and use up in Omelettes.

**Tip 2:** Use a wider pan so you can keep it thin. This is a time-saver as it cooks faster. Keep heat low-medium to avoid burning.

**Tip 3:** DO NOT fuss with the gentle pushing, folding and flipping part of making perfect French-style Omelettes. This is very time consuming and takes precision. The bottom often burns, before the top gets cooked. The stove to broiler method allows the bottom to set and the top to crisp quickly, and perfectly every time.

**Tip 4:** Carton egg whites are a quick and easy way to boost protein. I like a mix of whole eggs and egg whites for texture in my egg dishes. I even use egg whites cooked into oatmeal, or raw in smoothies.

*Did you know carton egg whites are pasteurized and food safe raw or cooked!*

## HIGH PROTEIN OATMEAL BANANA PANCAKES

### Ingredients: *(makes 12-15 pancakes)*

2 cups flaked oats or oat flour (use GF if necessary)  
2 ripe bananas  
1 cup cottage cheese  
2 tsp. baking powder  
4 eggs  
Butter, coconut oil or spray oil for frying  
Optional: nutmeg, vanilla extract, cinnamon, chocolate chips, blueberries

Recipe  
Variation  
Options

GF

HP

MF

NF

### Instructions:

- If using oats grind them to a flour in your blender first.
- Then, add all ingredients to a high power blender.
- Blend until all the ingredients are well combined.
- Add oil or butter to your pan on medium heat.
- Add batter to pan.
- When you see the batter bubbling, give them a flip.
- When both sides are golden brown, they are ready to serve.

*Toppings could include nut/seed butter, maple syrup, raspberry sauce, or yogurt .*

**Tip 1:** If you only have small smoothie size blender, you may need to mix batter in a bowl first and blend in small batches to ensure a smooth product.

## ONE BOWL EGG WHITE SOUFFLÉ

### Ingredients:

- 1-2 whole eggs
- ½ cup egg whites
- 1 oz. cheese (optional)
- Salt and pepper to taste
- Sprinkle of dry thyme or oregano or fresh Herbs
- drizzle olive oil
- 2 cherry tomatoes sliced

Recipe  
Variation  
Options

### Instructions:

- Use a medium sized microwave safe bowl
- Drizzle a small amount of olive oil in your bowl and spread around the bowl with your fingers so the egg doesn't stick.
- Crack 1-2 whole eggs then pour in ½ cup egg whites ( use cartons for ease and less waste).
- Add pinch of salt, pepper, herbs and a couple of sliced cherry tomatoes (any vegetable works).
- Whip it up with a fork and microwave for 1 min blasts with a quick mix in-between until the egg is set completely.
- Usually takes a total of three 1-minute blasts. Make sure to do blasts with stirring intervals or it won't cook evenly and you might get a bit of an egg white explosion.

**Tip 1:** Serve with your choice of fruits, toast, GF bread or roll up in a wrap and make an egg burrito.

**Tip 2:** Adding cheese is optional. For an added punch, add parmesan, or old cheddar for extra flavour.

**Tip 3:** Try with a side of sweet potato toast and avocado slices (slice a sweet potato in 1 inch slices, drizzle with olive oil and bake at 400°F until tender crisp ~15-20 min. Reheats well in toaster).

*By using a combo of eggs and egg whites, the yolks provide great nutrition and flavor, making the texture of egg dishes more appealing.*

## HARLEY'S BAKED APPLE CINNAMON FRITTATA

### Ingredients:

- 4 egg whites (from carton)
- 2 cups rolled oats
- 1 oz. cheese (optional)
- 2-3 tbsp. diced dried or fresh apples
- 1 tsp. cinnamon
- 2 tbsp. unsweetened, natural applesauce (for garnish)

### Instructions Stovetop:

- Heat up a pan on medium and coat with non-stick cooking spray when it's hot.
- In a separate bowl, mix together the egg whites, oats, cinnamon, and dried or fresh apples.
- Pour the mixture into the pan. Flip the pancake when the top starts to bubble. Cook until golden brown on each side.

### Microwave:

- Spray a non-stick baking spray on the inside of a microwave safe bowl.
- Put the egg whites in the bowl and mix in the oats, cinnamon, and dried or fresh apples.
- Cover the bowl with plastic wrap, but leave a small vent on one side, or poke holes in it with a fork so that the steam can come out. Microwave for 3-4 minutes.

**Tip 1:** Top with applesauce for garnish.

**Tip 2:** Adding more fresh cut apples as a topper is also an option.

**Tip 3:** Try with a side of mixed berries or nuts for added flavor.

### Instructions:

- Before getting started remove all water from your tofu. Chop onions and bell peppers while the tofu is draining.
- Heat ½ tbsp. oil in skillet for about 20 seconds. Then place chopped onion and chopped bell pepper in pan.
- Sauté for 3-4 minutes, or until onion is nearly clear. Move around onion and pepper while it cooks. When cooked, place onion and bell pepper in a separate dish and set aside.

Add 1 tbsp. of olive oil to your mixture, and then add to hot skillet, stirring every 30 seconds or so, for 6-7 minutes, or until edges of tofu become a golden yellow.
- Add onion and bell pepper to tofu mixture in pan, mix for 30 seconds, and serve hot. Add your tofu mixture to the wrap of your choice to make a breakfast burrito.

**Tip 1:** You can remove the water from the tofu by wrapping your tofu block in a clean kitchen towel or paper towel and then placing something heavy on top such as a cast-iron frying pan or some heavy books (if using books, place a barrier like a cutting board or sheet pan between your tofu and books so that the books do not get wet).

**Tip 2:** For your seasoning consider taco seasoning, steak seasoning, etc. for added flavour.

**Tip 3:** If this is a side dish, recipe yields 4 servings, 2 if this is your main breakfast.

- ½ tsp. garlic powder
- Salt, pepper to taste
- Dry herbs, grated parmesan if desired

### Instructions:

- Wash and dry your veggies.
- Line a large sheet pan or 2 sheet pans with parchment and set oven to 450 C. Keeping your veg more spread out will help with crisping versus steaming.
- Drizzle your oil on your veggies somewhat generously. For best results, rub and massage the oil into the veggies well. This gives them more crispy outsides, more even cooking and more flavor.
- Roast for 30 mins or until desired browning and crispiness. You can give them toss halfway through. If you want them browned more, you can broil for 3 mins.
- Salt, seasonings and the garlic powder go on at the end once removed from the oven.

**Tip 1:** Drying your veggies well gives the best results; as does fresh versus frozen. Excess water makes results a soggy product so save the frozen veg for stir fry and steaming. This roasting technique works well for almost any vegetable, including root veggies like potatoes or squash, but these take a bit longer to cook.

**Tip 2:** In general, the smaller you chop your veggies, the shorter the cook time, this is a great tip if you're short on time but make sure if you're roasting multiple kinds of veggies on the same sheet, that they're of similar size and cook time or some might burn while the others aren't cooked through.

**Tip 3:** Roasted veggies reheat well or enjoy cold as leftovers! Eat on their own or add to salads, with kale, tomatoes, seeds and bake feta.

## TURKEY MEATBALLS

### Ingredients:

- 2 lb. of ground turkey
- 1 cup breadcrumbs (or panko or rolled oats)
- $\frac{2}{3}$  cup onion, minced
- $\frac{1}{2}$  cup fresh parsley, minced
- 2 large eggs
- 3 cloves garlic, minced
- 2 tsp. Worcestershire or soy sauce
- $\frac{1}{2}$  tsp. dried basil
- $\frac{1}{2}$  tsp. dried oregano
- Salt and freshly ground black pepper
- $\frac{1}{4}$  cup olive oil

### Instructions:

- In a large bowl, combine ground turkey, breadcrumbs, onion, parsley, eggs, garlic, Worcestershire sauce/soy sauce, basil, oregano, 1 teaspoon salt, and  $\frac{1}{2}$  teaspoon pepper.
- Using a strong spatula or your hands, mix well until all ingredients are combined, and then shape the mixture into 1-inch diameter balls.
- To cook the meatballs, you have the option of baking them, or frying them. Both options are below.

#### To bake the meatballs:

Preheat oven to 400 °F. Line a rimmed baking sheet with foil or parchment paper for easy cleanup. Arrange meatballs on baking sheet, brush with oil, and bake for 15-20 minutes until browned. The edges should be crispy.

#### To fry the meatballs:

Heat olive oil in a large skillet or frying pan over medium-high heat. Fry the meatballs in the hot oil for 5 to 7 minutes until browned on all. You may need to fry them in batches. Let cooked meatballs sit on paper towel on a plate to absorb some of the extra oils.

**Tip 1:** To ensure meat is cooked, an internal thermometer should read 165°F for 15 seconds.

**Tip 2:** Depending on the size of your frypan you may need to fry in batches. Add more oil between batches if the skillet looks dry.

**Tip 3:** You can freeze extra the raw meatballs and store in your freezer for up to 1 month. Just arrange in a single layer on a baking sheet. Freeze until solid, about 1 hour, then transfer to a freezer safe baggy or container and store to use later.

### Instructions:

- In a large-rimmed skillet or large pot heat olive oil, shallot/onion, and garlic over medium heat. Sauté for 2-3 minutes, stirring frequently, until slightly softened. Turn down heat if browning.
- Add carrots and a pinch of salt and stir. Cook for 3-4 minutes more, then add marinara sauce/tomato sauce and stir up.
- Add red pepper flake, basil, oregano, water, and lentils. Increase heat slightly and bring mixture to a simmer (i.e., so that it is lightly bubbling), then reduce heat to low/medium-low and continue cooking until lentils are tender – stirring occasionally – about 17-20 minutes. Add a bit more water if mixture gets too thick.
- While the sauce is cooking, spiralize your zucchini into noodles using a spiralizer, mandolin, or a vegetable peeler.
- Once the lentils are cooked, taste and adjust seasonings as needed: adding more salt to taste, red pepper flake for heat, or herbs to balance the flavour.
- Serve the pasta over noodles and garnish with desired toppings.

**Tip 1:** You can also sub any kind of pasta if you do not want zucchini pasta.

**Tip 2:** Sauce will keep in refrigerator up to 3 days or in the freezer 1 month.

**Did you know/ Lentil or bean pastas don't spike blood sugars as much as regular pastas? This is due to their high protein and fiber content, making them a great choice for pasta night. They're also usually gluten free!**
